Testing:

177°C for 42 days – Piezo Circuit.

200°C for 12 days – Quartz Circuit

Software V42:

Our software is now easier to load. A one button set-up procedure automatically installs our software and communication cables. We've also made it easier to connect to the gauge. You no longer have to manually choose your COMM port. Our software will search out and locate the DataCan communication cable for you.

New Products:

New Products

LEAK DETECTOR - The Leak Detector tool or RTD/Piezo tool (fast response external temperature plus pressure tool) is now fully commercialized.

SMART CABLEHEAD - Our RTD/CCL/Piezo tool is also moving through the final stages of development. We hope to offer this tool in a commercial capacity very soon.

New Distributors:

DataCan is pleased to announce two new strategic alliances.

HSS will represent DataCan in the Asia-Pacific market. Based out of Singapore, HSS is well positioned to support its broad client base.

B.Y.S. Performance Thru Engineering S.A. will represent DataCan in Ecuador, Peru, and Colombia.
