

PRESS RELEASE

DataCan Services Corp. achieves ISO9001:2015 certification

Red Deer, AB - May 23, 2017

DataCan Services Corp., a global leader in high performance instrumentation for the oil and gas and mineral extraction industry, is pleased to announce they have achieved International Organization for Standardization (ISO) 9001:2015 certification.

“The achievement of this certification is a testament to DataCan’s commitment to quality and continuous improvement. Management is proud of all the effort our staff has put in to achieve the ISO9001:2015 Certification” James Wright, Director of DataCan Services Corp.

About DataCan Services Corp.

Since 2006, DataCan has been a worldwide supplier of high performance, innovative temperature and pressure recording systems for use in the oil and gas, and mineral extraction (example: potash) industries. We specialize in downhole tool data collection solutions for extreme environments. The product line also includes the Lee Specialties line of production logging, surface acquisition systems and software product lines.
